

The Anaconda Ride

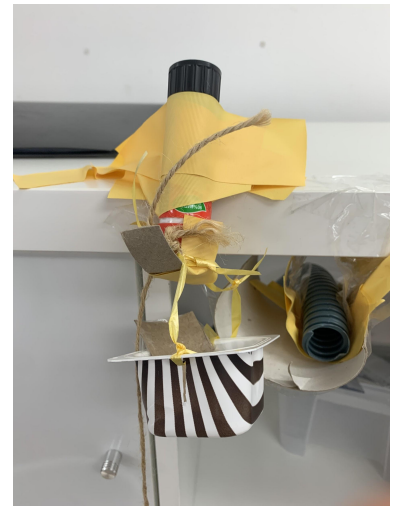

The Best Ride
Ever Designed

What makes it unique?

Here are some tips why
this roller coaster is
unique:

1. It is placed like an anaconda that is climbing a tree
2. The entrance after the pulley is anacondas face.

3. that has this roller coaster is a new kind of pulley system for the whole roller coaster is in a tunnel that is painted from each side.
4. The pulley system e roller coaster.

How does it work?

Once you will get pulled up by the pulley you will fall to the mouth of the anaconda and will travel it's inside while you will watch at all the things he ate. You will accelerate while going down and will start to slowly decelerate when you will slightly start to go straight. Then it will stop in the pulley.

How does the pulley work?

The pulley works mainly because of weight when we have one row of chairs where you sit you together weight around 350kg if all seats taken and on other side is 1000kg, you will go up and go to the mouth of anaconda.

Extra selling points:

Buy the latest model of the Anaconda ride and will not wait till it will be build for real.

When you will buy the latest model of the anaconda ride you will not stop playing with it. You will spend an hour playing with it and will be amazed with the model.
