- Was it successful?

GOALS

Learning goal.

- to be able to sew with ease.
- able to follow a metric pattern cutting book.
- learn new skills like sewing, creativity and design.

Product goal.

- to make a dress that is function-able , aesthetically pleasing to the eyes.

Process

Date : November 2nd - January 28th

While making this dress, I came to the conclusion that sewing is not as easy as it looks. Sewing in zippers is even harder, but if you put your mind to something, you can always achieve your goal.

Challenges

My biggest challenge with this project was being able to write exactly 15 pages because I thought that I wouldn't be able to get that many pages. Ms. Merna told me that I shouldn't worry about the pages because I would have to many but I didn't listen to her. Turns out I had to reduce my project by 5 pages.

Did my project turn out to be successfully done?

In my and others opinion, my project turned out well. The dress was perfectly fitting and it looked good on the ice. If I had more time to work on the dress, I would have changed the design of the gems.

Product

Thank You
